1. Applicant's amendment filed on 9/16/05 has been received and entered in the case.

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

3. Claims 6-11, 13-15, 18 and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sasabata et al in view of Kawai.

Note figure 5 of Sasabata et al, where the FET is transistor 43, the first port is terminal 48, the second port is terminal 49, the first control signal input is the voltage applied to the gate of transistor 43 and the second control signal input is the signal applied to terminal 48. The shunt FET, though not disclosed, would have been obvious to one of ordinary skill in the art because it is well known in the art that a switch such as that included within circuit 52 is typically formed using a transmission gate structure such as that disclosed in figures 7 and 8 of Kawai. The motivation for using such a structure as that disclosed by Kawai is simply to obtain the well-known advantages associated with such a transmission gate

Art Unit: 2816

structure (and also to provide a specific implementation of the switch in figure 5 of Sasabata et al which is shown generically). Once this specific implementation is made, there will be an FET shunting the gate of transistor 43 to ground (corresponding to applicants shunt transistor 46 in instant figure 3). This shunt FET in the combined Sasabata et al/Kawai circuitry will have a drain terminal directly coupled to the gate terminal of Sasabata et al's transistor 43.

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL.** See MPEP § 706.07(a).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

Art Unit: 2816

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
